Career Skills

Backend Development
(Laravel, PHP, MySQL)

RESTful API Development &
Integration

Multi-Tenancy Architecture

Authentication &
Authorization Systems

Automated Testing
(PHPUnit)

API Documentation
(Postman, Swagger)

Clean Architecture &
Service Repository Pattern

Debugging &
Troubleshooting in
Production Environments

Summary

Backend Laravel Developer with 1 year of hands-on experience in building, optimizing, and maintaining web applications. Skilled in Laravel, PHP, MySQL, RESTful APIs, and multi-tenant architectures. Proven track record in delivering secure, scalable systems, enhancing backend performance, and applying clean architecture principles. Experienced in three companies (internship & full-time) with strong problem-solving, teamwork, and communication skills.

Employment

Backend Developer **Feb 2025 - Present**

Industrial General Services (IGS) Company

- Built and maintained API-based systems with Multi-Tenancy architecture for scalability and data isolation.
 - Developed a complete Bugs Tracker system from scratch.
 - Applied Service Repository Pattern and SOLID principles across projects.
 - Designed ERDs for undocumented legacy systems.
 - Practiced automated testing with PHPUnit after specialized training.
 - Integrated APIs with frontend teams for dynamic user experiences.
- Key Projects: Safety Hub, Bugs Tracker, Safe Print, ERP System, Fire Management.

Backend Developer **Dec 2024 - Feb 2025**

Code Studio Company

- Created core ERP system modules (attendance, department management).
- Built backend for E-Learning Platform with student tracking and assignments.
- Integrated third-party APIs to improve system interoperability.
- Applied Service Repository Pattern for maintainability.
- Collaborated with frontend developers to ensure seamless API integration and data flow.
- Optimized database queries to enhance system performance and reduce load times.
- Implemented secure authentication and role-based access control for system users.

Personal Skills

Problem-Solving & Critical Thinking

Strong Communication

Team Collaboration

Time Management

Continuous Learning

Technical / Software Skills

PHP, Laravel, SQL, OOP, SOLID, PHPUnit, Redis, HTML, CSS, JS Basics, Git, GitHub, Postman, Swagger, Trello, RESTful APIs.

Education

Bachelor's Degree in Computer Science

Oct 2023 - Aug 2027

Zagazig University, Zagazig, Egypt

Languages

Arabic: Native Speaker

English: Basic

Backend Developer (Intern)

Aug 2024 - Dec 2024

Masr Web Company

- Supported backend development for Real Estate Management System and Law Firm Platform.
- Designed and optimized MySQL schemas for improved performance.
- Implemented secure authentication and role-based access control.
- Enhanced API performance and reduced query latency.

Certificates

Backend Diploma

Jul 2024

Nasr City, Cairo

Projects

- Bugs Tracker – Full system for tracking software bugs with team-based role permissions, advanced filtering, and real-time statistics.
- Safety Hub – Industrial safety management platform with audits, incident tracking, investigations, and lessons learned.
- ERP System – Modular enterprise platform for vendor, inventory, HR, and finance management.
- News-SocialNetworkSite- Developed dashboard & admin panel with custom authentication, real-time notifications (Redis), and dynamic AJAX-powered RESTful APIs. Managed posts/comments with guest restrictions, user blocking, and admin inquiry notifications. Optimized database queries, cutting load time by 20%.
