Summary

As an Engineer and being a Front-End Developer, I build and maintain responsive React applications using Typescript, HTML, CSS, Tailwind CSS, JavaScript, React. I'm a self-driven developer passionate about clean code, modern UI practices, and always eager to learn and apply the latest front-end technologies.

Work Experience

Route React Frontend Development Diploma (Feb 2025- present)

Data Entry [Cloudai.solutions](#) for Ai solutions services (August 2024-Nov2024)

Projects

1) Social app [Live Demo](#)

The **Login** and **Register** pages of the Social App allow users to securely access or create an account. The login form includes fields for email and password, while the registration form collects necessary user data to create a new profile. Both pages offer a clean, user-friendly interface and basic validation to ensure correct input. These forms are essential for user authentication and maintaining personalized social experience. **I used React libraries with Tailwind CSS**

1) React app (first framework) [Live Demo](#) (Jul-2025)

I was responsible for Design Front-End interface, including dynamic routing, UI components to. Use Floating Form by **bootstrap**, use Modal to display and control images. It is a responsive web application built using **React.js**, showcasing the fundamentals of component-based architecture, state management, and props. It features a clean UI, interactive elements, and smooth navigation. It is planned for learning and practice, the app demonstrates modern React development principles and offers a solid foundation for building scalable front-end applications."

2) CRUDS [Live Demo](#) (Jul-2025)

I was responsible for building the CRUDS to control the Elements (CRUDS Operations). Bookmark CRUDS is a dynamic web application for managing bookmarks using full CRUD operations—Create, Read, Update, and Delete. Built **with HTML, CSS, and JavaScript**, it offers a user-friendly interface, real-time validation, and **local storage** integration, allowing users to efficiently organize and control their favorite links in one place.

3) Book store app [Live Demo](#) (Jul2023)

Booking is a responsive web application creating for managing hotel or service reservations. It features a modern UI, smooth navigation, and user-friendly booking forms. Built with React and styled using bootstrap, it ensures fast performance, mobile compatibility, and a seamless user experience for both guests and administrators. **by react**

4)Fruity shop [Live Demo](#)

(Jan 2023)

Fruity online is a modern, responsive e-commerce platform specializing in fresh fruits. It offers a clean interface, easy navigation, and secure checkout. Users can browse a variety of fruit products, view details, and make purchases effortlessly. Developed with user experience in mind, it ensures smooth performance across all devices."

5) Landing page- [Live Demo](#)

(2022)

This landing page is a sleek, responsive design built to promote a single product or service effectively. It features a clean layout, engaging visuals, and clear calls-to-action. Optimized for performance and user experience, the page ensures fast loading, mobile compatibility, and a professional presentation suitable for marketing purposes."

Education

Faculty of Engineering, Department of Computers and Information

Al-Azhar University

(2017-2021)

Skills

Frontend Development:

- HTML5, CSS3, SASS, jquery
- JavaScript (ES6+), TypeScript
- React js, Hooks , State Mangement
- UseForm , Next js ,context API
- REST API Integration,
- Version Control: Git & GitHub
- UI Libraries: Bootstrap, tailwind

Soft skills:

-
- | | | |
|-----------------------|---------------------|-----------------|
| • Communication | • Time Management | • Teamwork |
| • Problem-Solving | • Creativity | • Self-Learning |
| • Attention to Detail | • Critical Thinking | • Collaboration |

Hobbies

Reading

Bodybuilding
