

Rahul Kumar

Senior System Engineer

PROFILE SUMMARY

Results-driven Java backend Developer with over 9 years of experience, specializing in Spring Boot, Microservices, and Kafka. Currently serving as a Senior System Engineer, excelling in designing and maintaining robust applications to enhance operational efficiency while ensuring high-quality code. Eager to contribute to innovative projects that demand stability and scalability.

EDUCATION

2014	B.Tech/B.E. Himachal Pradesh University (HPU)
2009	XIIth English
2007	Xth Hindi

WORK EXPERIENCE

Sep 2024 - Present	Senior System Engineer DB Schenker - Developed and maintained applications utilizing INFOR SCE Warehouse Management System to streamline operational processes. - Collaborated with cross-functional teams to enhance logistics application efficiency and performance. - Analyzed system requirements and implemented solutions to improve application functionality within the logistics domain. - Provided technical support and training to stakeholders, optimizing user engagement with the application.
Oct 2023 - Jul 2024	Java Back End Developer IBM - Developed robust Java backend APIs for various applications, enhancing system performance and reliability. - Executed core Java development tasks, contributing to the seamless integration of application components. - Collaborated effectively with cross-functional teams to gather requirements and implement scalable solutions. - Engaged in debugging and optimizing existing code, resulting in improved application efficiency and reduced response times.
Nov 2021 - May 2023	Senior Consultant Capgemini - Led the banking project focused on enhancing user access to financial details and credit card information. - Developed and implemented solutions for web login interfaces, optimizing user experience and security. - Collaborated with cross-functional teams to gather requirements and deliver tailored banking

solutions. - Conducted thorough testing and troubleshooting to ensure accuracy and reliability of financial data displays.

Senior Java Software Engineer

HCL Technologies

- Developed and implemented application code, driving improvements in data flow and overall software functionality. - Delivered regular enhancements based on client specifications, ensuring alignment with business needs and user requirements. - Independently supported existing applications, troubleshooting and resolving issues to maintain performance and usability. - Collaborated with team members to optimize coding practices and enhance application performance through effective coding solutions.

Sep 2016 - Jan 2019

Senior Java Developer

CHETU

- Developed and maintained Java-based components and interfaces to enhance user information solutions. - Implemented efficient coding practices to ensure high-quality, scalable, and maintainable software. - Collaborated with cross-functional teams to gather requirements and deliver tailored software solutions. - Optimized existing systems for performance improvements, reducing response times and increasing user satisfaction.

Dec 2014 - Sep 2016

Android Developer

Mobiloitte Technologies

- Collaborated with cross-functional teams to gather and analyze requirements for project workflows. - Designed and implemented efficient project workflows, enhancing overall development processes. - Developed robust applications using Java, ensuring high performance and reliability. - Actively contributed to all phases of the software development lifecycle, from requirement analysis to deployment. - Utilized problem-solving skills to optimize existing processes and improve project outcomes.

Projects

352 Days

Warehouse Management System

- Developed a comprehensive Warehouse Management System significantly enhancing operational efficiency. - Implemented streamlined processes for item receipt and put-away procedures, optimizing warehouse activities. - Coordinated shipment order management, ensuring timely picking, packing, and dispatching of items. - Established a cycle counting system that improved inventory accuracy by tracking pallet locations using license numbers.

123 Days

Amazon Code Whisper AI to develop Web service application POC

- Developed a Proof of Concept (POC) web service application using Amazon Code Whisper AI tool for Visa. - Led the initiative to explore the capabilities of AI in accelerating software development processes. - Collaborated with cross-functional teams to ensure alignment on project goals and deliverables. - Demonstrated the potential of Amazon Code Whisper in optimizing code generation, enhancing efficiency.

577 Days

Wells Fargo Banking Application

- Led the migration of the Wells Fargo Banking application from

Spring MVC framework to Spring Boot, enhancing system performance and scalability. - Implemented microservices architecture, enabling modularization of the application for improved maintainability and deployment efficiency. - Collaborated with cross-functional teams to identify key requirements and streamline workflows, resulting in a 30% reduction in application response time. - Conducted rigorous testing and debugging to ensure seamless integration of new functionalities, maintaining high standards of security and reliability throughout the project.

609 Days

Medical Clinical Trial Web Application

- Implemented SQL queries on Oracle database for efficient data management. - Enhanced the application based on feedback from medical personnel, ensuring functionality met industry standards. - Developed modules for managing clinical trial records and related data effectively.

243 Days

Toll Courier Company Web Application

- Managed application development using Java and JSON web services to enhance user tracking features. - Implemented functionalities to allow users to track their shipments effectively. - Collaborated with the team to ensure timely delivery of high-quality software solutions.

1095 Days

Artigem Gemstone Insurance Company

- Created REST JSON web services for frontend applications and managed database interactions according to client requirements. - Successfully implemented functionality for insurance claims processing based on agile methodologies. - Participated in code reviews to enhance the quality and maintainability of the application.
