I am an extroverted Frontend Developer with 3 years of experience in ReactJS (Hooks), TypeScript, and Atomic Design, building scalable and maintainable UIs. My expertise lies in optimizing complex Forms, including anti-design patterns, for projects like POS systems and Dashboards, refining Form logic to minimize rerenders and boost performance. Driven by an open mindset, I actively listen, embrace constructive feedback, and thrive in collaborative teams, keeping ego aside to ensure team success

INIT TECHNOLOGY

Sydney Tool Website & POS

October 2024 - Present

Team size: 7 members
