

# CAO TIEN THANG

## Software Engineer

District Phu Nhuan, HCM City • 0839952856 • caotienthang9a1@gmail.com

---

### SUMMARY

Magento Developer with a strong foundation in PHP, SQL, and JavaScript, and hands-on experience with Elasticsearch and REST APIs. I have also contributed to internal research projects using Java and Python, broadening my expertise across multiple programming languages. Proficient in Docker and Git, I ensure efficient and streamlined development workflows. Additionally, I have practical experience in data import and e-commerce projects, and I am eager to apply my skills to new and challenging opportunities.

---

### SKILLS

- **Programing Language:** PHP, Python, Java
- **Frontend:** JavaScript, jQuery, HTML, CSS, NodeJS
- **Tools:** PHPStorm, XDebug, Docker, GitHub, VSCode, PyCharm, Jira, Postman, GPT, Copilot, RestApi
- **Framework:** .NET, Magento 2
- **Databases:** MySQL, Elasticsearch
- **Language:** Basic English Communication

---

### EDUCATION

Ho Chi Minh City University of Technology (Hutech)

08/2020 - 08/2024

Software Engineer

GPA:3.3/4.0

---

### CERTIFICATIONS

TOEIC (Listening & Reading) - Score: 595

04/2025 - 04/2027

---

### WORK EXPERIENCE

#### SmartOSC

01/06/2024 - 01/06/2025

Software Engineer

Worked as a Full-Stack Developer on Magento 2 projects, developing custom modules for various client requirements. Responsible for analyzing requirements, proposing solutions, and estimating tasks using Jira. Designed REST APIs, handled webhooks, automated tasks via cronjobs (e.g., invoice generation, CSV/email), and customized Elasticsearch queries. Worked with MySQL for data storage and processing. Used Git/GitHub for version control (pull, push, commit) and collaborated effectively in a team environment. Converted product data for Magento imports and resolved issues based on client feedback.

#### Fujitsu

05/2023 - 08/2023

Intern

Participated in a real-world project using Java and the .NET Core framework. Assisted with various frontend tasks involving Bootstrap and JavaScript, gaining hands-on experience in both backend and frontend development within a collaborative team environment.

## PROJECTS

### E-commerce Integration for Muji

01/01/2025 - 26/05/2025

Software engineer

Responsibilities

- Analyzing technical documentation related to integrating NhatTin into Magento 2.
- Designing and developing APIs to handle outgoing and incoming logs during Nhat Tin transactions.
- Developed API integration between MUJI and Nhat Tin
- Built REST API for printing invoices, merging data into a consolidated PDF file.
- Implemented a cronjob to automatically send emails and generate CSV files
- Developed a cronjob to create order invoices via REST API and storing responses in the database for management and tracking.
- Handle the webhook from Nhatin to update the order status

Technologies: Rest Api, GitHub, Docker, XDebug, PHP Storm, PHP

### E-commerce Support for Thermo Fisher

01/09/2024 - 26/05/2025

Software engineer

Responsibilities

- Full-Stack development
- Developing custom modules
- Convert customer data into Magento's default CSV import format to update products.
- Modify the Elasticsearch query to adapt to customer requirements.
- Fix issue from feedback Client

Technologies: Elasticsearch, MySQL, Javascript, JQuery, HTML, CSS, GitHub, Docker, XDebug, PHP Storm, PHP
