

Sabreen Atallah Ahmed

📍 **Country** : Egypt- **City**: Qena
📞 **Phone** : +20 011 4403 2118
✉ **Email** : sabreenattalh@gmail.com

Objective :

Passionate and detail-oriented Full Stack Developer with over 2.5 years of programming experience. Skilled in designing and developing ASP.NET Core API and *React.js* applications with modern UI/UX. Looking to contribute my expertise to impactful projects, especially in the healthcare technology sector.

Technical Education & Training:

- Completed **Full Stack Development Roadmap** (24 programming levels), covering backend (ASP.NET Core API, C#) and frontend (React.js, JavaScript, HTML, CSS, Bootstrap).
- Studied Database Design & Development with SQL Server and Entity Framework (Code-First).
- Learned **Software Architecture Concepts** including Configuration, Logging, and API best practices.
- Hands-on practice with **real-life healthcare system** projects(ClinixPro, TamreedCare, MediLink).
- Gained experience in **UI/UX design** using Canva and modern web styling techniques.Volunteer from the Medicine for All Foundation, Qena

Technical Skills:

- **Languages & Frameworks**: C#, ASP.NET Core API, JavaScript (ES6+), React.js, HTML5, CSS3, Bootstrap
- **Databases**: SQL Server, Entity Framework (Code-First)
- **Tools & Platforms**: Git/GitHub, Visual Studio, Visual Studio Code, Canva
- **Other Skills**: RESTful API development, CRUD operations, Authentication & Authorization, LocalStorage-based applications

Projects:

1. MediLink – Medical Ticketing & Room Management

Role-based system for doctors, nurses, and patients.

- **Tech:** ASP.NET Core API, JS (LocalStorage), Bootstrap, SQL Server
- **Key Features:** Medication countdown alerts, room conflict prevention, ticket archiving, and daily reports.

2. Library Management System

Manage books, borrowers, loans/returns, and fines.

- **Tech:** ASP.NET Core MVC/API, EF Core, SQL Server
- **Key Features:** Repository pattern, migrations, and role-based permissions.

3. Pizza Restaurant System

Ordering and inventory management.

- **Tech:** ASP.NET Core, EF Core, SQL Server, JS
- **Key Features:** Transaction-safe inventory updates, order history, and reporting.

4. DVDL Project – Licensing Management

Applicants, tests, license issuance/renewal, and audit trail.

- **Tech:** C#, WinForms/WPF or ASP.NET, SQL Server
- **Key Features:** Validation workflows and searchable records.

5. To-Do List – Task Manager

Create, edit, filter, and prioritize tasks with due dates.

- **Tech:** React / JS, LocalStorage, ASP.NET Core API (optional)
- **Key Features:** Persistent state, inline editing, and responsive UI.

6. Booking System – Reservations

Room and appointment booking with availability checks.

- **Tech:** ASP.NET Core API, EF Core, SQL Server, JS
- **Key Features:** Conflict detection, time-slot rules, and DTOs for front-end integration.

Courses & Certifications:

- **24 Certificates in Programming Foundations**
Covering **C# development, Problem Solving, Databases, and ASP.NET Core API** with advanced features.
- **React.js for Front-End Web Development**
- **ICDL Certification (International Computer Driving License)**

Language Skills:

- Arabic: Native
- English: Proficient

Soft Skills:

- Strong communication and presentation skills
- Creative problem-solving and analytical thinking
- Time management and task prioritization
- Ability to adapt quickly to new technologies □ Team collaboration and leadership skills
