

Dang Duy Duc

REACT DEVELOPER

Date of birth: 19/08/2003
Gender: Male
Phone: 0327944710
Email: dangduyduc1908@gmail.com
Address: District 12, TP HCM
Website: facebook.com/dangduyduc1908/

OBJECTIVE

Every destination needs a start and efforts. As a newbie with passion and eagerness to learn. I dream of an environment for self-development and self-improvement. My goal is simply to make myself professional, confident with my ability of Front-end fields and create products with real value. I aspire to devote my youth to the work I pursue...

EDUCATION

August 2021 - Today

Nguyen Tat Thanh University

Major: Software Technology

Member of Executive Committee of Youth Union of IT Faculty

Medium score: 8.59

Course grades:

- Web programming course: 9.0
- Data structures and algorithms: 8.55
- Database management system: 9.7

HONORS & AWARDS

29/04/2023

Third prize in software engineering contest organized by Faculty of Information Technology

- My team has 5 member.
- We created an e-commerce website with full functions such as search, shopping cart, and pages for sellers and admins.
- The project interface is made of Reactjs, NextJs and calls the api to get data from the backend. Backend is made from java (spring boot) with database as SQL Server.
- I designed the database and wrote the api to be able to link with the frontend. In the frontend, I have created login, registration, home page, product details page, shopping cart page.

WORK EXPERIENCE

10/03/2023 - Today

MINDX TECHNOLOGY SCHOOL

MENTOR REACT COURSE

- I take classes and guide students to learn and work with Reactjs and NodeJs(ExpressJs)
- At this school, I got a deeper understanding of Reactjs while teaching other students like how useEffect hooks work,...

05/08/2022 - 01/11/2022

DIGIEX GROUP

REACTJS DEVELOPER INTERN

- Short-term training on processes, working/ report tools, Typescript
- Participate in the building of some flows in 2 real projects (outsource projects from Korea)
- Get trained and participate in the actual project testing process.
- I learned more other libraries related to Reactjs like React-hook-form, query-string,... . Working with frameworks like Nextjs, create-react-app and css framework bootstrap, tailwindcss,
- More proficient with git, how to work in groups and the backend team. Cleaner way to code.
- Join in project created a website with Nextjs. I made interface client page like the shopping cart and admin page like edit information of admin's account, and CRUD categories of product.

PROJECTS

01/03/2023 - 25/04/2023

E-COMMERCE SITE WITH MANY PURCHASE AND SELLING

Reactjs, Nextjs, Tailwindcss, Redux Toolkit, Spring boot, SQL Server

Description:

- Team size: 5 member
- This project created for the section engineering competition organized by the faculty of information technology
- I have created login, registration, home page, product details page, shopping cart page.
- When I finished the project, I better understand the functions that a sales page should have, learn how to optimize the code, learn how to use redux toolkit, redux thunk to manage the state of components and projects.

04/01/2023 - 10/01/2023

NETFLIX CLONE

Reactjs, Nextjs, Firebase, Tailwindcss, Recoil

Description:

- The project is only I do
- A movie app made like Netflix. There are login and registration functions using firebase authentication. You can

watch video trailers of popular and latest movies in theaters today. Use React hook form to validate forms like login, registration. Use firebase's firestore to store information about movies that are added to the user's own playlist. Use Recoil to manage application state.

- The apis are taken from themoviedb (themoviedb.org) and use axios to use these api.
- I Understanding how to call api and how to work with axios library, worked with firebase to be able to login save user information, and save movies to user list, search movie with movie name.

12/2022 - 01/2023

FACEBOOK CLONE

Reactjs, Redux Toolkit, Context API, TailwindCss, NextJS, React Hook Form, Firebase, JSX

Description:

- The project is only I do
- Facebook interface design, post creation function, login, account registration, search, responsive.
- Use cloud firebase to save user information, save posted articles.
- Use firebase's storage to store user avatars, photos with articles. Can chat in real time between accounts.
- The software can post interactive articles with the community, connecting people together.

Github: github.com/duyduc2003/facebook-fe.

8/2022 - 11/2023

WEBSITE SELLING NUTRITIONAL WATER:

Reactjs, React hook form, TailwindCss, Bootstrap, NextJs

Description:

- My team is team front-end of Digiex company.
- I participated in this project at Digiex company during my internship.
- Design the interface of the shopping cart page, and the ordering function, work through the API.
- Design the product catalog management module of the admin page and add, edit and delete categories, work through the API.
- Design a website with personal information about the admin page, and do the information editing functions through the API.
- I learned more other libraries related to Reactjs like React-hook-form, query-string,... . Working with frameworks like Nextjs, create-react-app and css framework bootstrap, tailwindcss, More proficient with git, how to work in groups and the backend team. Cleaner way to code.

07/2022 - 10/2023

YOUTUBE CLONE

Html, Css, Bootstrap, Javascript

Description:

- The project is only I do
- Design youtube interface based on youtube.com.
- Can watch the video.
- Adaptable on any device screen.
- When I finished the project, I learned how to divide the layout for the website, how to use parametes on the url so that it can identify specific videos.

SKILLS

English	Read and write
----------------	----------------

Worked well with languages	Javascript, Java, HTML, CSS, C#, Nodejs
-----------------------------------	---

Libraris Frontend	Tailwindcss, Bootstrap, Bulma Alpinejs, Lit, Axios
--------------------------	---

Framework	Nextjs, Reactjs Spring boot, ASP.NET MVC, ExpressJs, NestJs
------------------	--

Services	Firebase
-----------------	----------

Database	MonggoDB, SQL Server
-----------------	----------------------
