· Position: Onsite LPBANK

- Description: The uniform-web project, developing an internal app for LPBANK's staff and employees
- Using technology: Angular 10.5
- Tasks performed: Developing the user interface and integrating APIs based on the BA's documentation

FULLSTACK DEVELOPER

Project: Schat (https://chat.schat.vn/)

- Description: Schat is a web project that utilizes OpenAl's artificial intelligence to automatically respond to messages, integrated into websites and various platforms such as Zalo, Facebook, and more.
- · Using technology: ExpressJs, Mongodb, ReactJs
- · Position: team leader
- Backend:
 - · Design functionality and processing flows
 - · Design database
 - · Develop APIs for application
 - Integrate and utilize Google API
 - · Integrate and utilize OpenAI API
 - · Write Postman documentation
- · Frontend:
 - · Mentor team members
 - Design and build layout for website
 - · Custom theme for website
 - Build partials components
 - Implement the frontend interface and integrate APIs

MOMTECH

Slink

2/2024 - 9/2024

2/2022 - 1/2024

FULLSTACK DEVELOPER

Project: GoalF (https://checkin.goalf.vn)

- · Using technology: Angular 15, bootstrap 5
- Implementing interface designs from Figma and integrating APIs
- Building modules and services for implemented functions
- Integrating existing modules
- · Discussing design and expanding system functionality
- Writting backend api (ExressJs):
 - Write CRUD Api
 - · Validate fields api
 - Use a schedule to send daily recurring notifications

Project: KHENNHAU (https://khennhau.com)

- · Using technology: Angular 15, bootstrap 5
- Learning to use tools and technologies in the project
- · Studying various modules
- · Implementing interface designs from Figma and integrating APIs

FULLSTACK DEVELOPER

Github link

- Back-end: https://github.com/duyphuc174/team-work-api
- Front-end: https://github.com/duyphuc174/team-work-client

Technology

Back-end: ExpressJs, MySql

• Frontend: Angular, Bootstrap

Description: A team task management application

Main features:

- · Login, registration using JWT
- CRUD workspaces, works, tasks,...
- · Functionality: search, sort, filter
- Some key features:
 - Workspace management
 - Member management
 - · Work management
 - Task management
 - Notification
