

Nguyễn Ngọc Sang

Front-end Developer

khu thái bình dương, Tân Phước Khánh, Tuân uyên, Bình Dương sangdev2000@gmail.com

0326905400

Full name: Nguyễn Ngọc Sang Date of birth: 24/09/2001 Email: sangdev2000@gmail.com Phone number: 0326905400

Here's the translated introduction:

I am a Frontend Developer with experience in building web applications using React.js, TypeScript, and libraries like Ant Design and Tailwind CSS. I have strong skills in converting Figma designs into precise HTML/CSS interfaces, optimizing user experience, and working with APIs. Additionally, I have experience in supporting backend development with Node.js and Express.js.

Skills:

Languages: JavaScript (ES6+), TypeScript Frontend: React.js, Next.js, Redux, Context API, Tailwind CSS, Ant Design, Styled-

Components

Backend: Node.js, Express.js

Tools: Git, GitHub, GitLab, Sourcetree, Figma, Photoshop, Illustrator Development Practices: RESTful API, Responsive Design, Web Animation

Language Skills

English: basic

Chinese: HSK 3 Level

Work Experience

ORBIT TECHNOLOGY Frontend Developer

03/2023 - 09/2024

Project: 63car

Description: Car sales website

Responsibilities:

Converted Figma designs into responsive HTML/CSS interfaces compatible across multiple devices

Integrated with APIs to display data

Utilized React, TypeScript, React Hooks, styled-components, and Ant Design Implemented a CMS system with role-based permissions for admin and sales staff

*******Link: 63car Website

Position: Frontend Developer

Description:

Converted designs into interactive user interfaces using Next.js.

Developed features such as shopping cart, payment processing, and product management.

Optimized performance and user experience using modern technologies like React and Styled Components.

Connected to APIs to display product data and user information.

Project Link: Furniture E-commerce Website

Description: A modern e-commerce platform for selling furniture, offering a user-friendly interface and seamless shopping experience.

Responsibilities:

Developed responsive and visually appealing user interfaces using React.js and CSS.

Implemented design layouts based on Figma mockups, ensuring pixel-perfect accuracy and responsiveness across devices.

Integrated RESTful APIs to fetch product data and facilitate user interactions, including product search and filtering.

Utilized state management tools like Redux to manage application state effectively, improving performance and user experience.

Collaborated closely with UX/UI designers to enhance usability and accessibility of the website.

Optimized web performance by implementing lazy loading, code splitting, and image optimization techniques.

Conducted thorough testing and debugging to ensure a smooth and bug-free user experience.

Technologies Used: React.js, Redux, CSS, Figma, Axios, RESTful API, Responsive Design

Project: Kibble Exchange

Description: Blockchain-based token exchange application

Responsibilities: Converted Figma designs into HTML/CSS interfaces and developed user role-based permissions

*******Link: Kibble Exchange

roject: Aimetafi

Description: Blockchain-related platform

Responsibilities: Converted Figma designs into interfaces and implemented role-based permission features

*******Link: Aimetafi

Personal Project E-commerce Project

Role: Developer

echnologies: ReactJS, Redux, Axios, Stripe, HTML5, CSS3, Bootstrap 4

Features:

User: Login, registration, manage personal information, purchase products, manage orders, payment via credit card, and comment

on products

Admin: Manage products, users, orders, and comments Payment Functionality: Integrated with the Stripe platform

Source Code Management: Utilized GitHub

FASTCODING VIETNAM

Converted design files (PSD, AI, Figma) to HTML/CSS (SASS), using jQuery for basic JavaScript functionalities Analyzed designs and estimated completion time

Tested and fixed bugs based on the provided documentation

Education

FPT APTECH MAJOR : SOFTWARE DEVELOPMENT

03/2023 - 09/2024 ranked in the top 9 of the Techwiz competition among several hundred participating

teams,

The website is about selling furniture and user experience

Hobbies

Exploring new technologies Designing and developing user interfaces

Reading books and researching software development
